WORK EXPERIENCE

Story Block

Full Stack Developer

New Orleans, LA
October 2018 – Present

- Create ADA compliant HubSpot modules with HTML+HubL/CSS/JS
- Develop application front end for company's SaaS products in various frameworks
- Develop application back end for company's SaaS products in Node
- Research, explore, and experiment with new tech for blogs and video content
- Create scripts and tools for automating workflows
- Develop solutions for integrating 3rd party software using APIs

365 Connect, LLC

Front End Developer

Metairie, LA
Aug 2017 – Apr 2018

- Spearheaded an Angular 4 greenfield reconstruction of an enterprise-level .NET app, implementing Google Maps from the Google API, a fully responsive drag and drop/select file upload, and multiple JS graphing libraries, among other key features.
- Integrated Angular 5 into a legacy .NET platform.
- Developed using moderate TDD principles and coded my own Jasmine test suites.
- Worked with a team of four other developers in an Agile Scrum environment.
- Handled version control and bug tracking with Git and GitHub.
